COMPANY PROFILE

Since its launch in 2007, Adore More have strived to offer superior quality, environmentally friendly products that help elevate property standards to offer optimum comfort, elegance, and return on investment.

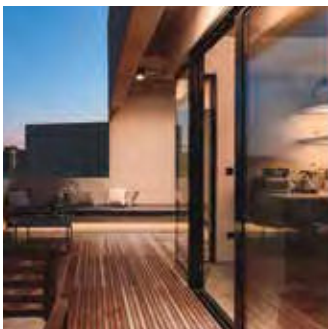

Whether the project is a large-scale building or a small one, our flexible solutions enable us to accommodate all types of properties with a variety of top-quality brands and materials.

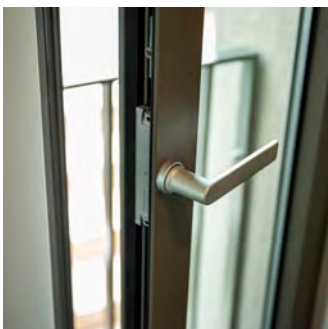

We strongly believe that quality products need to be supported with an excellent level of service. Our ongoing investment in our team in terms of training and support has allowed us to expand our business and offer the supply and installation of a wide range of superior products including:

- **uPVC Apertures,**
- **Aluminium Apertures,**
- **Steel Apertures,**
- **Solid Wood Apertures,**
- **Gates,**
- **Fencing,**
- **Railings**

Our business development and technical personnel are well versed in this industry and work toward finding the most suitable solutions to finish projects in accordance with specifications and maximize clients' return on investment. Our team of professionals will guide you, step by step through the full process, right up to the completion of the project, offering expert and honest advice, backed up with years of product knowledge and experience. The team is also supported with a company fleet of vans and cars.

We are very selective when it comes to our international suppliers and have a network of reputable, certified partners whom we have tried and tested over the years.

Some of our partners include: Thermoplastiki (Greece) with: Koemmerling, Alumil, Schuco and Elvial profile systems and Pantaleo (Italy) for solid wooden apertures.

Over the years we have embarked on a number of projects with high profile clients including:

betsson group

At Adore More we are committed to supplying the highest level of service and the broadest selection of quality brands and products. We endeavour to continuously innovate and set the standard of excellence in the aperture industry in Malta and Gozo, while providing exceptional customer satisfaction, a safe working environment and quality solutions offering excellent return on investment.

Contact us on sales@adoremore.eu or +356 2145 6570/ 2145 6560 to discuss how we can work together, or visit our showroom at Triq id-Difiza Civili, Mosta, MST 1743.

UPVC APERTURES

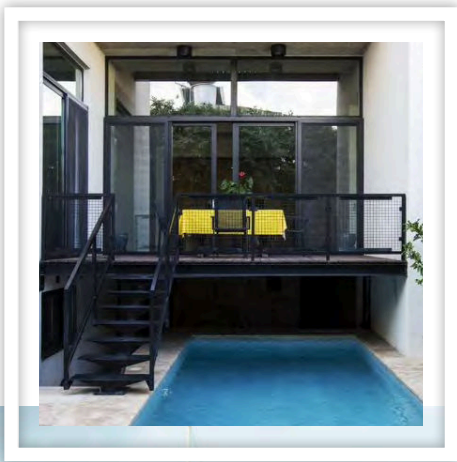

We import and install apertures in uPVC of the renowned German brands, KÖMMERLING & KBE. We provide a wide range of products which helps us offer and implement creative solutions to meet any specific needs and architectural requirements. Our PVC apertures are all made-to-measure, manufactured overseas and received ready for installation by our professional team of in-house installers.

ALUMINIUM APERTURES

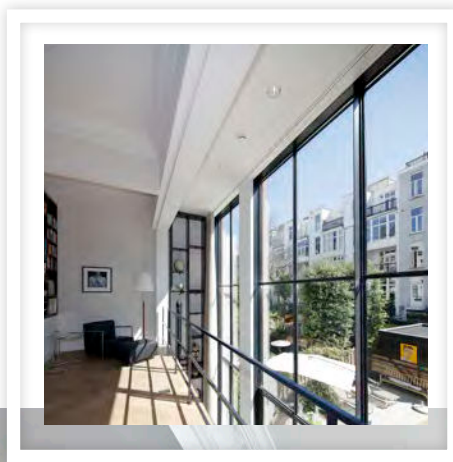

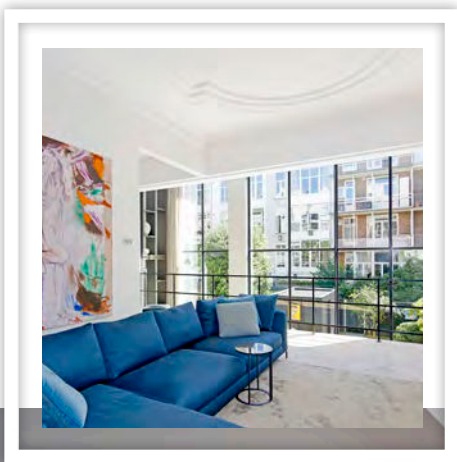

Our Schüco and Elvial aluminium systems are of high end quality and comply with the highest German manufacturing and quality standards. Our Schüco systems come completed with the original mechanisms and hardware giving you high stability, energy efficiency, comfort and protection.

STEEL APERTURES

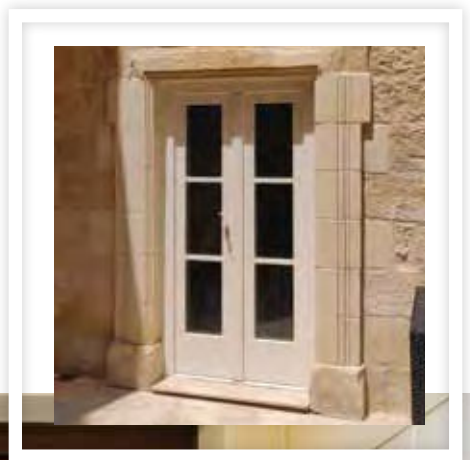

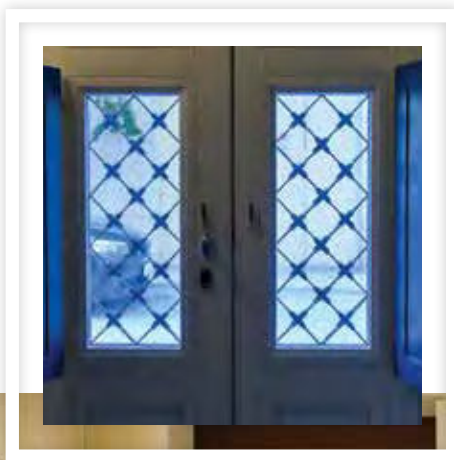

Our 100% steel apertures offer the highest level of quality and security for your property. With fillings up to 60mm, they provide excellent sound insulation and low U values. The sleek, minimalist design adds brightness and charm to any project, enhancing the property's character with a premium finish.

SOLID WOOD APERTURES

Our 69mm solid wood profile, which is made of 3 solid / glued-laminated timber can be customized to any design and specifications. We use materials that are of the highest quality, certified timber, and high-end robotic electrostatic varnishing paint, which offer the great advantage of having flexible varnish, thus avoiding cracks with wood movement.

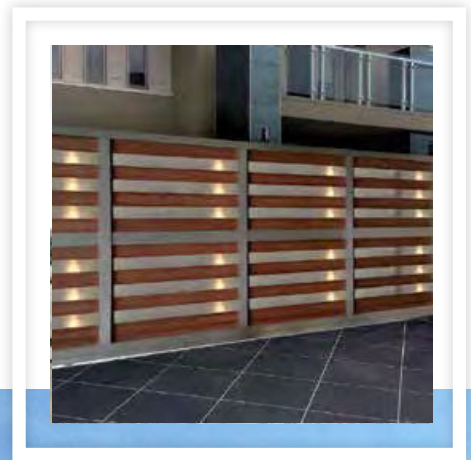

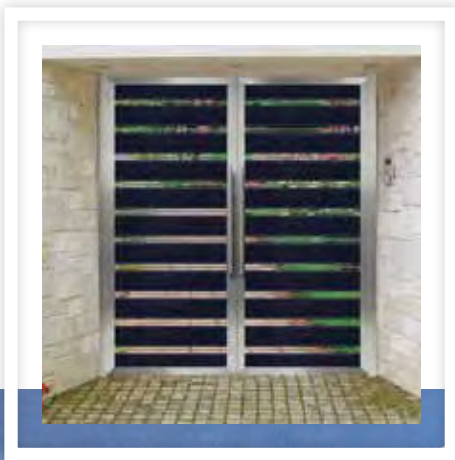

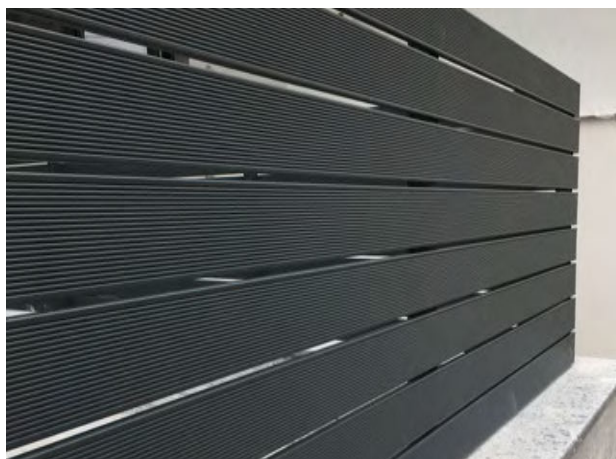

GATES, FENCES & RAILINGS

We supply and install top quality, stylish range of glass, aluminium and wrought iron gates, railing and fences. Our range of low-maintenance and durable gate structures include swing, pedestrian and sliding gates and can cater to very large dimensions. All products are available in a wide range of colours and styles offering privacy and security without compromising on appearance.
